

# How to create first Selenium test in Robot Framework

## Eclipse (RED robot editor)

Step 1 : Install robot framework selenium lib

<https://github.com/robotframework/SeleniumLibrary/>  
`pip install --upgrade robotframework-seleniumlibrary`

Step 2 : Eclipse > Create a robot project  
Create a test suite  
Create test case

Step 3 : Add SeleniumLibrary in TestSuite

Step 4 : Create selenium test case and add steps
